## CONTENTS

<b>Marian Marschalko and Peter Juriš:</b> Task of engineering geology in land-use planning on the example of four selected geofactors	<b>275</b>
<b>František Krepelka and Lucia Ivaničová:</b> Possibilities of the evaluation of acoustic signal from the rock disintegration in a frequency domain	<b>284</b>
<b>Hosam El-Din Mostafa Saleh and Samir Basha Eskander:</b> Long-term effect on the solidified degraded cellulose-based waste slurry in cement matrix	<b>291</b>
<b>Barbara Bialecka:</b> Analysis of criteria for UCG siting and operation	<b>298</b>
<b>Gabriel Weiss, Slavomír Labant, Erik Weiss, Ladislav Mixtaj and Heidy Schwarczová:</b> Establishment of Local Geodetic Nets	<b>306</b>
<b>Michal Cehlár, Katarína Teplická a Stanislav Szabo:</b> Possibility of new mining project extracting in conditions of crisis	<b>314</b>
<b>Jana Naščáková, Erik Weiss, Petr Červenka, Ladislav Mixtaj and Roland Weiss:</b> A support of renewable source energy utilization and conditions for the biogas station investment	<b>323</b>
<b>Pavel Horovčák, Dušan Dugáček and Peter Cirbes:</b> Chemical formula depiction using web service	<b>330</b>
<b>Peter Trebuňa:</b> Experimental modeling methods in Industrial Engineering	<b>335</b>
